Annual Report 2025

INSPIRE. EDUCATE. ENGAGE.

Copyright 2024

About Us

We are a community of students and professionals united by our passion for **Space Exploration** and **Innovation.** Whether you're a stargazer, aspiring astronaut, or tech enthusiast, our club is the launchpad for your cosmic journey.

Our Vision

We envision a future where **SPACE CLUBS** members become pioneers in space-related fields, pushing the boundaries of knowledge and contributing to the global exploration of the cosmos. Together, we aspire to create a legacy that inspires generations to come.

Our Mission

Our mission is to **INSPIRE**, **EDUCATE** and **ENGAGE** students in the wonders of space. Through hands-on projects, workshops, and events, we aim to foster a community where the fascination with the universe becomes a catalyst for learning and collaboration

FOREWORD

When Space Clubs Lagos State University was conceived, it began as a simple but audacious idea: that students, regardless of background or resources, could meaningfully engage with space science, emerging technologies, and the future of human innovation. What started as a conviction has, over time, grown into a community—curious, resilient, and deeply committed to learning and impact. The year 2025 represents a defining chapter in our journey. It was a year marked by growth, experimentation, and resolve. Despite structural limitations, evolving systems, and the realities of building something new within a university environment, our members continued to show up—with ideas, with discipline, and with belief in what Space Clubs LASU could become. Together, we explored conversations around aerospace, sustainability, emerging technologies, leadership, and Africa's place in the global space ecosystem. More importantly, we nurtured a culture of inquiry and responsibility.

This Annual Report captures more than activities and milestones; it tells the story of people—students who chose to think boldly, collaborate intentionally, and pursue excellence even when the path was unclear. It reflects our collective effort to build not just a club, but a platform that prepares young Africans to contribute meaningfully to science, technology, and society. As the Pioneer and President of Space Clubs LASU, I am deeply grateful to every member, partner, speaker, and supporter who believed in this vision and helped move it forward. Your commitment affirms that the future of space and innovation in Africa is not distant—it is already being shaped, here and now, by young minds willing to learn and lead.

I invite you to read this report as both a reflection and a promise: a reflection of how far we have come, and a promise of the work that still lies ahead.

Thank you for being part of this journey.

INSPIRE EDUCATE ENGAGE

SPACE CLUBS
LAGOS STATE UNIVERSITY

Executive Summary

Overview

The year 2025 was a defining period for Space Clubs LASU marked by collective growth, increased external visibility, and purposeful community building. Throughout the year, the club delivered a balanced mix of technical sessions, outreach initiatives, and community bonding sessions, all aligned with its mandate to advance space science, technology, and student leadership.

Key Activities and Engagements

Space Clubs LASU executed a wide range of events spanning technical capacity development, thought leadership, space outreach, and community engagement. Core technical activities included the *Communicate Like an Engineer* Technical Communication Boot Camp, which strengthened members' professional and engineering communication skills, and *Byte & Build*, a two-day hands-on hardware makers' session introducing embedded systems and rapid prototyping using Arduino Uno.

The club also delivered astronomy and public engagement programs, most notably *Under the Epe Sky*, a stargazing night that promoted observational astronomy and science communication, and *World Space Week 2025*, during which seven distinct events were successfully executed across the week in alignment with global celebrations.

Leadership dialogue and intellectual exchange were reinforced through a high-level Fireside Chat with space futurist **Dr. Claire Nelson**, alongside regular general meetings and discussion sessions that supported coordination, knowledge sharing, and organizational alignment.

2025 at a Glance

- 14 events successfully held throughout the year
- 10 strategic partnerships and collaborations signed
- 200+ secondary school students reached through outreach and educational programs
- Launch of 6 major initiatives including merchandise, editorial community, newsletter, website, space education campaign, and Community Discussion Series
- Continental recognition: 1 member won the African Space Leadership Institute Essay Competition; 2 members won tech-based giveaway

SPACE CLUBS
LAGOS STATE UNIVERSITY

Activities, Events & Programs

• Technical and Capacity-Building Events

Communicate Like an Engineer

A capacity-building boot camp aimed at strengthening members' ability to communicate technical ideas clearly and professionally. The session emphasized engineering documentation, presentations, teamwork communication, and industry-relevant soft skills.

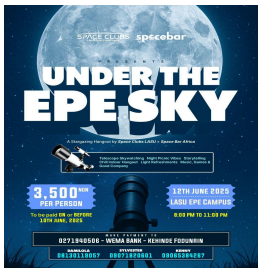

Byte & Build – Hardware Makers' Bootcamp

A two-day hands-on makers' session where participants were introduced to embedded systems using Arduino Uno. Members engaged in circuit design, programming fundamentals, sensor integration, and rapid prototyping, reinforcing practical engineering skills.

• Astronomy, Space Awareness, and Public Engagement

Under the Epe Sky

An astronomy outreach and experiential learning event designed to foster interest in observational astronomy. Participants engaged in guided stargazing, discussions on celestial objects, and informal science communication.

World Space Week 2025

Space Clubs LASU successfully executed seven events across the week in alignment with global World Space Week celebrations under the global theme "Living in Space". Activities spanned webinars, secondary school outreach programs, a call for Articles, and a space Movie Night. (Detailed documentation provided in a separate World Space Week report.)

• Leadership, Dialogue, and Thought Exchange

Fireside Chat with Space Futurist – Dr. Claire Nelson

A high-level dialogue session that exposed members to global perspectives on space development, futurism, and leadership. The session encouraged critical thinking on Africa's role in the global space economy.

General Club Meetings and Community Discussions

Periodic meetings and discussion sessions were held to align members on projects, share knowledge, get their feedbacks and strengthen community bond

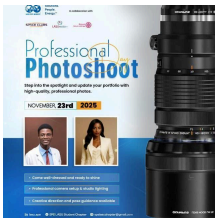

• Community Building

Founders' Day Celebration

A commemorative day recognizing the origins, growth, and legacy of Space Clubs LASU after one year , reinforcing institutional memory and what WE stand for.

Photo Day

In Partnership with the Society of Petroleum Engineers - LASU, we hosted a professional media session to provide our members with Professional headshots & Portraits boosting their Professional Confidence.

End-of-the-Year Mixer

A celebratory event marking the conclusion of the 2025 activities. The mixer featured reflection sessions, member spotlights, interactive games, vision-setting discussions for 2026, and a mentorship session that set the pace for 2026.

Space Jam

An end-of-the-semester community bond building session centered on games, icebreakers, and informal interaction, aimed at strengthening interpersonal connections and fostering a healthy club culture as students prepare for exams

• Membership Growth and Engagement

Membership Applications and Recruitment

Applications were opened to onboard new members into Space Clubs LASU, expanding the club's reach across faculties and departments.

New Member Onboarding Session

An orientation program introducing new members to the club's mission, structure, expectations, and opportunities for technical and leadership development.

• External Representation and Institutional Presence

Courtesy Visit to NASRDA – Centre for Space Transport and Propulsion (CSTP)

On the 28th of February, A strategic institutional visit aimed at exploring partnerships and collaboration opportunities with Nigeria's national space agency, particularly in space transport and propulsion-related activities was paid to the Centre.

Participation at Nigerian Space Symposium 2.0

Space Clubs LASU was well represented at the Nigerian Space Symposium 2.0, where the club's President served as a speaker. This engagement strengthened the club's visibility and positioned it as an active contributor to national space discourse.

Projects Corner

On April 1st, 2025, We commenced the parallel development of a Model Rocket (Project Aurora) and a CanSat mission, designed as an integrated flight system. The mission architecture involves launching the model rocket to an estimated altitude of 200–300 meters, deploying the CanSat at apogee, and enabling atmospheric data collection during descent while the rocket recovery system ensures a safe landing.

Mission Objectives

- Demonstrate end-to-end aerospace systems integration
- Apply rocketry, avionics, and recovery system principles
- Collect and analyze low-altitude atmospheric data
- Develop student competence in systems engineering and testing

Project Development Timeline

Phase Breakdown

- Research and Conceptualization: Completed
- System Roadmapping and Requirements Definition: Completed
- Preliminary and Detailed Design: Completed
- Fabrication and Subsystem Development: Ongoing
- Integration, Testing, and Validation: Upcoming
- Flight Test and Data Analysis: Planned

Overall Completion Status: ~50%

Model Rocket Development (Project Aurora)

Project Start Date: April 1st, 2025

Project Rationale

The Model Rocket project was initiated to provide hands-on exposure to propulsion fundamentals, structural design, stability analysis, avionics integration, and recovery systems. It serves as the primary launch platform for the CanSat mission.

System Overview

- Airframe and structural design
- Propulsion and Solid Rocket Motor selection
- Stability and flight dynamics considerations
- Avionics bay and deployment mechanism
- Recovery system (parachute-based)

Current Status

- Design phase completed
- Materials selection and fabrication planning ongoing
- Recovery system concept finalized

Key Constraints and Challenges

- Material availability and cost
- Manufacturing tolerances
- Launch site and safety considerations
- Financing

CanSat Development

Project Start Date: April 1st, 2025

Project Rationale

The CanSat project was initiated to introduce members to satellite subsystems, telemetry, sensing, and data analysis within a constrained form factor. The CanSat mission complements the Model Rocket by enabling atmospheric data acquisition during descent.

System Overview

- Structural enclosure (Can-sized)
- Sensor suite for atmospheric data collection
- Microcontroller and power system
- Data logging and/or telemetry
- Descent control and recovery

Current Status

- System architecture: defined
- Sensor selection and electronics design: completed
- Software logic and data pipeline: outlined

Key Constraints and Challenges

- Components Acquisition
- Financing
- Data Acquisition Platform/Software

Next Steps

- Fabrication and assembly of subsystems
- Ground testing and validation
- Integrated system testing
- Flight readiness review and launch campaign

OUTREACH, ADVOCACY & STEM EDUCATION

To achieve our mission - Inspire, Educate, Engage, We made outreach and STEM education a critical pillar of our activities in 2025, part of what led to the launch of the **Space4Naija Campaign**. Through direct school engagements, the club sought to inspire early interest in space science, promote experiential learning, and demonstrate the relevance of space technologies to real-world challenges. These initiatives aligned with the club's broader mission of nurturing future innovators and strengthening grassroots science education.

Space Education Mentorship Program (World Space Week 2025)

During the 2025 World Space Week celebrations, Space Clubs LASU, in partnership with the **African Space Foundation (ASF)** mentored over 100 primary and secondary school students in aeroponics and hydroponics as innovative approaches to growing plants in space and extreme environments. The mentorship program was delivered as part of a space-focused innovation challenge, encouraging students to apply scientific thinking, creativity, and problem-solving skills.

Impact

- Over 100 students mentored
- Improved awareness of space-based agricultural technologies
- Hands-on exposure to science-driven innovation at an early age

School Outreach Visits

In 2025, We conducted physical outreach visits to three (3) primary and secondary schools, engaging students through interactive talks, demonstrations, and discussions on space science and aerospace careers. These visits were designed to spark curiosity, demystify space-related fields, and present relatable pathways into STEM disciplines.

Schools Visited

- Rosenik College
- Temrej International Academy
- St. Theresa Catholic Private School

Engagement Highlights

- Introduction to space science and technology
- Career pathways in aerospace and related fields
- Interactive question-and-answer sessions

Impact

- Over 200 students reached
- Increased interest in STEM and space-related topics
- Strengthened relationship between Space Clubs LASU and local schools

SPACE CLUBS
LAGOS STATE UNIVERSITY

RESEARCH & PUBLICATIONS

We strengthened our knowledge-sharing culture through consistent research documentation and educational publishing. We prioritized accessible, student-driven educational content that documented activities, explained space and engineering concepts, to keep our members and audience informed. These outputs enhanced learning, continuity, outreach, and visibility.

The following knowledge outputs were produced and published during the year:

- **Reports published:** 3
- **Articles Unpublished:** 1
- **Articles published:** 4
- **Educational write-ups published:** 1
- **Newsletters released:** 1 edition

Articles

- "Space innovations for Renewable Energies" by Samuel Adebanjo
- "There is Enough Room in Space" by Rukayat Seriki and Praise Maye
- "Nigeria's Trillion-Dollar Opportunity" by Sylvester Agose
- "The Power of Space" by Stephen Odoziaku

Educational Write-Ups

- "Space Science" by Samuel Adebanjo

Reports

- Under the Epe sky Impact Report
- Space4Naija 2025 Impact Report
- World Space Week 2025 Impact Report

Newsletters

- "Space Hustle Culture: Future Jobs in the Space Economy"

PARTNERSHIPS, COLLABORATIONS & AFFILIATIONS

We strengthened our impact and reach through strategic partnerships and collaborative engagements with student bodies, industry stakeholders, professional bodies, and STEM-focused organizations committed to advancing space science, engineering, and innovation. They include;

- National Space Research & Development Agency - Centre for Space Transport & Propulsion (NASRDA - CSTP)
- Space Generation Advisory Council (SGAC)
- Spacebar Africa
- African Space Foundation (ASF)
- Universities Space Engineering Consortium - Nigeria (UNISEC Nigeria)
- Space Clubs Nigeria
- Decentralized Science Nigeria (DeSci NG)
- Aerospace Engineering Students' Association - LASU (AESA - LASU)
- Robotics and Artificial Intelligence Network - LASU (RAIN-INN LASU)
- Society of Petroleum Engineers - LASU (SPE LASU)

ACHIEVEMENTS

1. Successfully launched the official Space Clubs LASU **merchandise** featuring t-shirts, Jotters, Pens, Cards and Stickers, strengthening brand identity, visibility, and member affiliation while laying the foundation for long-term community bond.

2. Launched **The Orbit**- Space Clubs LASU's official editorial community, to serve as a structured platform for thought leadership, technical writing, science communication, and student-led discourse in space science and engineering.

3. Launched **Space4Naija**- a dedicated space education and advocacy campaign aimed at increasing space awareness, STEM participation, and grassroots engagement across primary, secondary, and tertiary education levels in Nigeria.

4. Launched the **Community Discussion Series (CDS)**, creating a recurring forum for informal and casual conversations on current space trends, space science, technology, policy, and innovation.

5. Successfully launched the official Space Clubs LASU **website**, providing a centralized digital hub for organizational information, projects, publications, events, partnerships, and public engagement.

6. Launched the Space Clubs LASU **newsletter** to consistently communicate activities, opportunities, achievements, and educational content to members, partners, and the wider space community.

7. Launched the Space Clubs LASU **YouTube channel** as a multimedia platform for videographic content, event recordings replays, interviews, outreach documentation, and long-form visual storytelling.

8. Institutionalized a culture of excellence by introducing a structured system for **recognizing and celebrating outstanding members**, contributions, and achievements within the club.

9. Successfully planned and executed **15 impactful events** throughout the year, spanning technical training, professional development, outreach, networking,

advocacy, and community engagement.

10. Conducted space outreach visits to **three secondary schools**, directly engaging and educating over **200** students on space science, innovation, and STEM career pathways.

11. Delivered a comprehensive and high-impact celebration of World Space Week 2025, featuring multiple programs, collaborations, and educational initiatives that significantly expanded the club's visibility and outreach footprint.

12. Organized and hosted a **stargazing** night experience, providing participants with hands-on exposure to observational astronomy and fostering public interest in space science beyond the classroom.

13. Celebrated a major individual achievement as one of our members emerged **first place** in the African Space Leadership Institute (ASLI) Essay Competition, earning an all-expense-paid trip to Kenya to attend the 9th African Space Generation Workshop.

14. Recorded notable wins in external space engagement initiatives, with two of our members emerging as winners of the *#EgusiToSpace giveaway* by **Space in Africa**, each receiving an **HP EliteBook 840 G5 laptop**

FINANCIAL OVERVIEW

We maintained a structured and responsible approach to financial management. Funds were managed in accordance with internal financial guidelines, with expenditures aligned strictly to approved programs, events, projects, and operational needs.

Sources of Funding

- Membership and Executive dues
- Ticket fee (Exclusive events only)
- Sponsorships
- Merchandise Sales
- Donations

Expenditure Overview

- Events and programs execution
- Outreach and STEM Education
- Projects
- Branding & Merchandise
- Administrative & Logistics Support
- Miscalleanous

Financial Performance Snapshot:

At a glance, Space Clubs LASU's financial performance in 2025 reflects prudent spending, effective fundraising, and sustainable operations.

- Total funds raised in 2025: NGN750,000+

- Total expenditure in 2025: NGN700,000+

CHALLENGES & LESSONS LEARNED

Challenges

- Balancing an ambitious calendar of events with School activities
- Coordinating activities across a growing and diverse membership with varying academic schedules and commitments
- Managing task deadlines within executives
- Appropriate Funding
- Sustaining momentum and consistency amongst executives and the community

Lessons Learned

- Proper and strategic planning of events ahead of the year must be prioritized
- Early budgeting, diversified funding sources, and pro-active funding approach increases chances
- Clear role definition, team leadership structures, and communication channels are critical
- Iterative design, early prototyping, and component sourcing hastens project feasibility

APPRECIATION & ACKNOWLEDGEMENT

We extend our sincere appreciation to all individuals and organizations whose support, dedication, and collaboration contributed to the successes recorded in 2025.

We acknowledge the unwavering commitment of our members, whose passion, discipline, and willingness to learn formed the backbone of every initiative, project, and outreach effort undertaken during the year. Their contributions, both technical and organizational, were instrumental to the club's growth and impact.

Our gratitude also goes to the Executive Council and team leads for their leadership, coordination, and service. Their strategic direction, operational oversight, and resilience ensured the effective execution of programs and the smooth functioning of the organization.

We sincerely appreciate our partners and collaborators for their trust, guidance, and support. Their contributions through mentorship, resources, platforms, and opportunities significantly amplified our reach and strengthened the quality of our engagements.

We extend special thanks to our speakers, facilitators, and resource persons who generously shared their expertise, insights, and time across our technical sessions, outreach programs, and discussions.

We are grateful to Lagos State University for providing an enabling environment for student innovation, learning, and collaboration, and for its continued support of student-led initiatives.

Finally, we appreciate all supporters, volunteers, and well-wishers who contributed in various capacities throughout the year. Your belief in the mission of Space Clubs LASU continues to inspire us as we work toward greater impact in the years ahead.

SPACE CLUBS
LAGOS STATE UNIVERSITY

TESTIMONIALS

“One of the most memorable parts of this experience was our outreach to schools, where we had the chance to educate young students about space and the Sustainable Development Goals (SDGs). Teaching the kids helped me realize how important awareness and education are in shaping the future.”

- Umar .O., Club Member

“Space Club LASU played a pivotal role in my winning a new laptop through the Space in Africa's *#EgusiToSpace giveaway*. Their timely updates, answer guidance, and collective support were the key to my success. Thank you, Space Clubs”

-Eniola .A., Club Member

“Through Space Clubs Lasu I was able to apply for an essay writing competition organized by ASLI and by God's grace I was part of the top 3 winners. Space Clubs Lasu also gave me a voice, a chance to publish my articles. In other words it's an amazing community that brings out the best in its members”

-Stephen. O, Club Member
